

Go Fishing at Rough River Dam State Resort Park

Rough River Dam State Resort Park sits along the banks of Rough River Lake, where anglers can catch largemouth bass, spotted (Kentucky) bass, white crappie, bluegill, hybrid striped bass, and channel catfish. Boat anglers may access Rough River Lake at one of seven boat ramps, including a ramp at the park.

Rough River below Rough River Lake Dam provides both bank and float fishing opportunities for the same fish species listed for the lake. A 6.6-mile section of the river may be floated from near the campground below the dam downstream to just above the falls of Rough. A total of 6,300 rainbow trout are stocked in Rough River at Hwy 54 Bridge near Hites falls by the Kentucky Department of Fish and Wildlife Resources from April through September. Another 2,000 rainbow trout are stocked just below Rough River Lake Dam in June.

Visitors to Rough River Dam State Resort Park may stay overnight at Rough River Dam Lodge, one of 17 cottages, or the campground.
